

A DEVELOPER OF ARTIFICIAL INTELLIGENCE

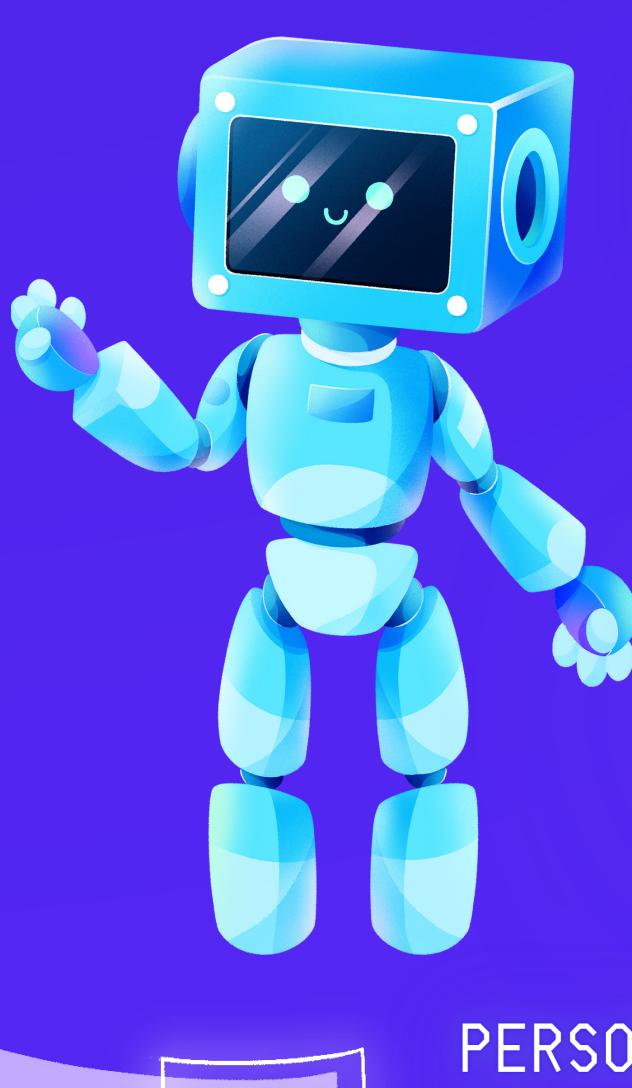

8 YEARS FROM NOW

8 years from now I wanted to see my self developing artificial intelligence, and automating task.

ENHANCED ACCURACY

I wanted to make my task easier and less time consuming, and I wanted to develop AI because it can sweep any task faster.

CONTINUOUS LEARNING

AI are also those who learn within every data, and by it the more it has the more it will be more reliable.

80%

STATISTICS

PERSONALIZATION AND CUSTOMIZATION

I believe AI is the future. and I believe that with the help of AI it can make our life much more productive.

AUTOMATION

I like to have my AI do every work that I have for me, and by developing them in the future can save money by no longer hiring much more employee.
